SKILLS

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript

Data/ML: Pandas, NumPy, Scikit-Learn, TensorFlow, Flask, GeoPy

DevOps: Git, GitLab, GitHub, VS Code, Vercel, Anaconda, Jupyter, Spyder

Testing: Unit Testing, Test Driven Development, Regression Testing, UML

Web/Frontend: HTML, CSS, Tailwind CSS, React, Next.js, Node.js

Other: Software Design, Agile, Scrum, Paramiko, Flask, Azure, Active Directory, Windows, Mac, Linux

PROFESSIONAL SKILLS

Problem Solving, Critical Thinking, Communication, Collaborative, Time Management, Leadership, Reliability, Creativity, Flexibility, Willingness to Learn

EXPERIENCE

SOFTWARE ENGINEER, MICATU INC.

APRIL 2024 – PRESENT

- Developed and maintained production applications in Python; contributed to the design and implementations of new software solutions.
- Designed and developed simulations to evaluate firmware upgrade builds to prevent performance regressions.
- Analyzed and visualized data from customer power grid sites to assess the deployed products performance and system accuracy with high voltage measurements.
- Assisted in the design, development and testing of embedded firmware using C, and C++.
- Executed test plans and regression testing to validate firmware performance, new feature implementations, and algorithm changes.
- Worked with cross-functional teams in an Agile Scrum environment, quickly adapting to new technologies to meet evolving project needs.

ROBOTIC PROCESS AUTOMATION INTERN, CFCU

DEC 2023 – APRIL 2024

- Primary project during this internship was uChoose API application used to calculate and set member bonus reward points based on established requirements set by the credit union board members.
- Designed automated solutions to improve efficiency and data management across departments.
- Utilized Python, PowerShell, UML Diagrams, data analysis, testing, and Object-Oriented Programming concepts to provide accurate technical solutions.
- Maintained data security of member's information, met strict delivery timelines, and coordinated with stakeholders effectively.

INFORMATION TECHNOLOGY CO-OP, BORGWARNER INC.

JAN 2022 – JUNE 2023

- Delivered technical support to automation systems, implementation of software integration and installation on company machines to meet production and department requirements.
- Assisted Business Applications department in company database migration project to the replacement service the organization required.
- Utilized knowledge in technology-based tools such as Python, Command-Line, SQL, Active Directory, Data Structures, OOP, SQL Server RU Scorecard Management, Azure, Troubleshooting,
- Effectively communicated with team and supported clients, Windows operating systems and applications.
- Completed the configuration of new employee user profiles, company devices such as phones or PCs.

SOFTWARE ENGINEER INTERN, TECH FOR GOOD INC.

JUNE 2021 – AUG 2021

- Developed Mission UpLink application that was used to visualize deployed internet access hardware on a global map for potential investors and company strategic operations.
- Used Python, Pandas, GeoPy, Pandas, React, JavaScript, HTML, and Tailwind CSS for full-stack development.
- Participated in the entire SDLC from planning to testing, and open-source deployment.
- Engineering responsibilities also included the integration, deployment testing, and presentation of the application to be featured on the company's open-source website.
- Contributed to project development documentation, flowcharts, layouts, diagrams and contributed clean commented code.
- Utilized Git and GitHub for remote repository contributions and approvals of team lead requirements.

EDUCATION

LOUISIANA STATE UNIVERSITY, COMPUTER SCIENCE B.S.

2023 – 2024

FINGER LAKES COMMUNITY COLLEGE, COMPUTER SCIENCE A.S.

2020 – 2022

Dean's List 2021

Bill White Memorial Scholarship Recipient – Student Excellence in Technology Studies

PROJECTS

CS PORTFOLIO WEBSITE, APPLICATION DEVELOPMENT

Python, React, Tailwind CSS, HTML, JavaScript, TypeScript, Vercel, Git, GitHub, Maintenance, Troubleshooting, Debugging

CHATBOT, MACHINE LEARNING

Python, Flask, TensorFlow, NumPy, Data Structures, Algorithms, Object-Oriented Programming

NBA PREDICTIVE ANALYTICS, MACHINE LEARNING

Python, Pandas, NumPy, Scikit-Learn, Data Structures, Algorithms, Object Oriented Programming
